-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-90 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jones et al in view of Ahmed et al (6,095,426) and Official Notice. Jones discloses the invention substantially as claimed. Jones discloses a control means for a refrigeration system that monitors various parameters to determine when the system is not operating properly and provides reports and predication commentary based upon the analysis of the system performance. Ahmed teaches the use of regression neural network results to vary system set points and identify system characteristics in order to determine optimum control setpoints and adjusting of the set points accordingly. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the system of Jones such that it included the use of regression neural network results to vary system set points and identify system characteristics in order to determine optimum control setpoints and adjust of the set points accordingly in view of the teachings of Ahmed. Official Notice is taken that the specific parameters of the system control recited in the claims are conventional control parameters and thus it would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the system of Jones to include such parameters in the control system.
